PROFILE

Software engineer with ~2 years of experience in Python development, data analysis, and application building. Adept at turning requirements into clean, maintainable solutions with a strong foundation in SDLC, testing, and client-facing project delivery. Passionate about writing efficient code, learning emerging technologies, and contributing to impactful software products.

EXPERIENCE

Software Engineer—Tata Elxsi, Onsite (Pune, MH),
Dec 2023 – Present

- Contributed to embedded codebases (Embedded C, RTOS) using Git-based workflows.
- Developed Python-based tools following SDLC best practices (Git, Jira, unit/integration testing).
- Automated 3+ reporting workflows, reducing manual effort by 30% through Python-based validation scripts integrated into enterprise testing environments.
- Participated in a generative AI bootcamp; built prototypes for workflow automation.
- Client engagement:** Supported Mahindra & Mahindra with Python-driven validation/testing in an enterprise setup.

Intern—PHN Technology Pvt Ltd, Remote (Pune, MH),
Jul 2023 – Oct 2023

- Built an end-to-end sports analytics pipeline (T20 World Cup): scraped ESPN Cricinfo (Bright Data), cleaned with **Python/Pandas**, shaped in **Power Query**, and modelled KPIs in **Power BI (DAX)**.
- Delivered interactive dashboards for player comparison and Playing XI selection (filters, drill-downs, head-to-head); documented data sources, refresh, and KPIs for reproducibility.

SDE Intern—BitMap Technology Pvt. Ltd., Hybrid (Pune, MH),
Jan 2023–May 2023

- Designed a **3-factor desktop authentication system** (Face ID, Email OTP, Voice).
- Integrated OpenCV, TensorFlow, and Tkinter with async UI and error handling.
- Secured delivery with .env secrets, SQLite persistence, and Gmail SMTP integration.

PROJECTS

Online Banking Authentication System Using AI

Python | NumPy | Pandas | OpenCV | TensorFlow | SQLite | SMTP | Tkinter

- Developed a 3-factor authentication desktop app (face, OTP, voice) with liveness detection and async UI.
- Achieved ~95% face ID accuracy, 88% spoof block rate, and <15s end-to-end latency.

CricketStat Pro—Sports Analytics

Python | Pandas | Web Scraping (Bright Data) | Power Query | DAX | Power BI

- Built a complete data pipeline: scraped ESPN Cricinfo, cleaned data with Pandas, shaped it in Power Query, and modeled KPIs in Power BI.
- Delivered player comparison and Playing XI selection with filters, drill-downs, and head-to-head views; documented data sources and refresh steps.

Flask Web App

Python | Flask | Authlib (OAuth 2.0) | Pillow | MoviePy | pyttax3 | HTML/CSS

- Built a Flask web app with Google OAuth login and a News Video Generator that converts images and headlines into MP4 videos with banners and narration.
- Integrated Pillow, MoviePy, and pyttax3 for automated image/video processing, ensuring a secure setup using .env, .gitignore, and deployment-ready documentation.

SKILLS

- **Languages:** Python, C, SQL (MySQL), HTML/CSS/JavaScript, ReactJS (Basic), OOPs
- **Libraries/Frameworks:** NumPy, Pandas, TensorFlow, OpenCV, Tkinter
- **Backend/Services:** FastAPI, REST, JSON, API Development(Basic)
- **Data & Analytics:** Power BI (DAX, Power Query), Excel
- **Cloud & DevOps:** AWS (Basics), Azure (Basics), GitHub Actions
- **Tools:** GitHub, Jira, VS Code, Jupyter, JSONPowerDB, Bright Data (Web Scraping)

EDUCATION

- **B.Tech, Computer Science and Engineering**—SGGSIE&T, Nanded | 2019–2023
CGPA: 8.80 | 1st Rank in 2nd Year (SGPA 9.88)
- **Class XII**—Cambridge Junior College, Nanded | 2018–2019
MHT-CET 2019: 97.17 percentile | JEE Main 2019: 89.42 percentile

CERTIFICATIONS

- **McKinsey Forward Program**—McKinsey.org—Oct'25
- **Software Engineer Certification**—HackerRank—Oct'25
- **Career Essentials in GitHub Professional Certificate**—Microsoft & LinkedIn—Jul'25
- **Microsoft Python Development Professional Certificate**—Coursera—Feb'25
- **Generative AI Certificate**—Microsoft & LinkedIn—Nov'24
